PROFILE

A pragmatic and highly motivated developer with a results-driven approach to problem-solving, specializing in backend development. With over 9 years of programming experience, I focus on implementing Clean Architecture in both modular monolith and microservice architectures to build scalable, maintainable systems. I deliver impactful solutions using technologies such as ASP.NET, .NET Core, jQuery, IIS, and Kestrel, with a strong emphasis on structured, well-organized code

WORK EXPERIENCE

Civic Merchandising Incorporated 2023 - PRESENT

Senior Web Developer(Manager)

- Design, Code and develop complex systems based on problem encountered or user requirements.
- Create reports based on management requirements using data from inter systems used by the company.
